

I am concerned about the proposed requirement to record and store all material broadcast between 6 am and 10 pm. Not only is there the issue of the first amendment protection of free speech, but more importantly there is the issue of the fifth ammendment protection against self-incrimination. I am not an attorney, but I believe that to be forced to record and produce evidence which could be used against us would be a violation of fifth amendment rights. Thank you for your consideration of this question.
